

A WORD TO GRIP SUFFERERS

The form of influenza commonly known as "the grip" is a disease of short duration usually running its course in from two to ten days. Medical treatment does not help much.

During its short course the grip makes havoc in the system, thinning the blood, weakening the nerves and leaving the nervous system fatigued and overstrained. An attack of the grip is often the unannounced cause of much suffering and chronic ill health later on. After the grip there is always danger of pneumonia unless the strength of the patient is built up so that the body can defend itself. It is a condition that calls for a tonic.

The best way to prevent this after-effect of the grip is to build up the blood and there is no better blood builder than Dr. William's Pink Pills.

As soon as the revitalized blood courses through the system you are aware of its soothing influence, definitely the color returns to the pale cheeks, appetite and digestion return and you are on the road to health.

Dr. William's Pink Pills are 10 cents per six boxes for \$1.00 at druggists or by mail from the Dr. William Medicine Co., Schenectady, N. Y. Write today for the free booklet, "Building Up the Blood."
